- VIII Obsolete Parts

All component parts and assemblies are grouped together as they are arranged in the machine.

All underlined part numbers signify assemblies which are made up of several component parts.

An asterisk preceding the part number indicates that this part has been redesigned. If this part has to be replaced on an older machine, the obsolete part listed in Section VIII must be ordered.

It is absolutely necessary that the ten-digit part number be stated on all spare parts orders. The central portion of this number, as a rule, is identical with the old part number. In exceptional cases, the old part number is listed in parenthesis below the new ten-digit part number.

Part number changes will be disseminated on special forms.

Subject to alterations in design.
