Ref. No. TTD-99-1014 June, 1999

# TMFXII/II-C TMFXIII/III-C TECHNICAL DOCUMENT (ELECTRICAL)

(9906)

# **FOREWORD**

This technical document is revised on the basis of TTD-94-1012 "TMFX-C Technical Document" in order to accommodate the contents for the TMFX-II/II-C and TMFX-III/III-C Series.

We hope this document will be helpful to you very much in your after-sale and other activities.

# TMFXII/II-C, III/III-C, General Machine Construction

### 1.Controller

### 1-1. General Functions of the Controller

Controller takes charge of all the embroidery machine operations and controls of embroidery machine.

# (1) Major functions of CPU Card [X-CPU]

CPU Card takes charge of all the machine controls in principle.

1) System Memory 256K byte

Data Memory 256K byte

- 2) I/F with Head Card and Color Change Card
- 3) Sensor I/F, including Rotary Encoder
- 4) I/F for input from UTC Sensor
- 5) I/F to control X/Y-axes
- 6) I/F to control Main Shaft Motor
- 7) PWM [Note\*] circuit to control Jump, Color Change, Upper Thread Holding Pulse Motors
- 8) I/F to control Thread Trimming, Picker Solenoid
- 9) I/F to control Operation Panel Card, FIP [Note\*\*], Extension Card, Floppy Disk Drive
- 10) PTR I/F, Communication I/F for serial I/F (RS-232C etc.)
- 11) Equipped with a P-ROM (IPL) for system program installation

### [Note\*] PWM: Pulse width modulation

A method to module pulse width, depending on the signal amplitude value (voltage, current)

[Note\*\*] FIP: Fluorescent Indicator Panel (registered trademark of NEC)

# (2) Major functions of Extension Card [FX2 ADAPTER BOARD]

Extension Card extends the capacity of Data Memory.

Data memory capacity (for extension): 512,000 stitches

# 1-2. Voltage check in the major inner sections

Use a tester in principle for voltage check.

Voltage value	Application	Measuring points Plus side	Minus side	Normal	Measuring
value		Flus side	IVIII IUS SIUE	range	range
+5V	* To control cards * To drive FDD * To drive FIP	Pin No.1 of CN2 on CPU Card	Pin No. 2 of CN2 CPU Card	+4.95V to +5.2V	DC
+12V	* To control cards	Pin No.3 of CN2 on CPU Card	Pin No.4 of CN2 on CPU Card	+11.0V to +12.5V	DC
+24V	* To drive PTR	Pin No.5 of CN2 on CPU Card	Pin No.6 of CN2 CPU Card	+25.0V to +27.0V	DC
-5V	* To control cards	Pin No.7 of CN2 on CPU Card	Pin No.2 of CN2 on CPU Card	-4.75V to -5.25V	DC

<Table 1> Power supply voltage for the Controller

# 2. Power Supply / Driver Box

# 2-1. General functions of Power Supply / Driver Box

Various types of power supply circuits and motor drive circuits for Main Shaft, X-axis and Y-axis are built-in.

# (1) Power Supply Card [X-P, R]

Generates power supply for various sections (common for both single phase and 3 phase) ±5V, 12V, 24V, 50V, 60V

# (2) Main Shaft Driver [X-DUB]

Drive circuit to control Main Shaft Motor with inverter and servo functions.

# (3) X/Y-axis Driver [X-DUA]

Drive circuit for X-axis or Y-axis motor (pulse motor)

# 2-2. Voltage check at the major inner sections

Use a tester in principle for voltage check.

# (1) Power Supply Card

Voltage	Application	Measuring points		Normal	Measuring
value	To supply power to	Plus side	Minus side	range +5.1V to	range
+5V	control the cards	Pin No.1 of CN1	Pin No.2 of CN1	+5.1V to	DC
+12V	To supply power to control the cards	Pin No.3 Pin of CN1	Pin No.4 Pin of CN1	+11.5V to +12.5V	DC
	To supply CPU Card with power to drive PTR	Pin No. 5 of CN1	Pin No.6 Pin of CN1	+25.0V to	
+24V	To supply Head and Color Change Cards with power to drive small type pulse motors	Pin No.1 Pin of CN2	Pin No.4 Pin of CN2	+27.0V	DC
+20V	To supply X/Y-axis Drivers with power to control cards	Pin No.4 pin of CN3	Pin No.2 Pin of CN3	+19.0V to +21.0V	DC
+24V (FXII, III/III-C)	To supply Color Change Cards with power to drive ATH and Picker Solenoids	Pin No. 2 of CN2	Pin No. 4 of CN2	+25.0V to +27.0V	DC
+50V (FXII-C only)	To supply Color Change Cards with power to drive ATH and Picker Solenoids	Pin No.6 of CN2	Pin No. 4 of CN2	+52.0V to +58.0V	DC
+60V	* To supply Head Cards and Color Change Cards with power for surge absorption circuit to suppress surge voltage, generated when small type pulse motors are operated.  * To supply Color Change Cards with power to drive Sequin Solenoid.	Pin No.3 of CN2	Pin No.4 of CN2	+52.0V to +58.0V	DC
-5V	To supply power to control the cards	Pin No.7 of CN1	Pin No.2 of CN1	-4.75V to -5.25V	DC
AC100V system AC200V	To supply Main Shaft Driver and X/Y axis Drivers with power supply to drive Main	Pin No.5 Pin of CN3	Pin No.6 Pin of CN3	AC90V to AC132V AC180V to	AC
system	Shaft Motor and X/Y axis Pulse Motors			AC264V	

<Table 2> Power supply voltage inside Power Supply Card

# (2) X/Y-axis Driver

Voltage	Application	Measuri	ng points	Normal	measuring
value	Application	Plus side	Minus side	range	Range
+5V	To control cards	Pin No.6 of CN3	Pin No.7 of CN3	+5.1V to +5.2V	DC
+12V	To control cards	Pin No.5 of CN3	Pin No.7 of CN3	+11.5V to +12.5V	DC
-5V	To control cards	Pin No.8 of CN3	Pin No.7 of CN3	-4.75V to -5.25V	DC
AC100V System AC200V System	To drive X/Y-axis pulse motors	Pin No.1 of CN2	Pin No.4 of CN2	AC90V to AC132V AC180V to AC264V	AC

<Table 3> X/Y-axis Driver - power supply voltage

# (2) Main Shaft Driver

Voltage	Application	Measuring points Normal		Normal	measuring	
value	Application	Plus side	Minus side	range	Range	
+5V	To control cards	Pin No.6 of CN3	Pin No.7 of CN3	+5.1V to +5.2V	DC	
+12V	To control cards	Pin No. 5 of CN3	Pin No.7 of CN3	+11.5V to +12.5V	DC	
-5V	To control cards	Pin No.8 of CN3	Pin No.7 of CN3	-4.75V to -5.25V	DC	
AC100V System AC200V system	To drive Main Shaft Motor	Pin No.1 of CN2	Pin No.4 of CN2	AC90V to AC132V AC180V to AC264V	AC	

<Table4> Main Shaft Driver - power supply voltage

### 3. Other cards

### 3-1. General functions of other cards

# (1) Joint Card

Joint Card is a card to divide input/output signal and power supply to the Controller.

# (2) Color Change Card [X-CHG]

Color Change Card is a circuit to drive needle position detection I/F, Color Change Motor (pulse motor), Thread Trimming Solenoid, Picker Solenoid and Sequin Solenoid.

Needle position detection I/F has a circuit to convert the voltage from potentiometer [Note] into digital signal (A/D converter) and input it as a needle position.

[Note] Potentiometer is a precision variable resistor.

# (3) Head Card [X-HEAD]

Head Card is a circuit to drive Jump Pulse Motor, Thread Holding Pulse Motor and to detect thread breakage signal I/F from Tension Base.

A signal when Thread Take-up spring contacts with Thread Breakage Detecting Contact Point is transmitted to Tension Base Card  $\rightarrow$  Head Card  $\rightarrow$  CPU Card for thread breakage detection.

# (4) Tension Base Card

- 1) Detects thread breakage with Thread Take-up Spring.
- 2) Has Tension Base Switch and LED.
- 3) LED is lit in green and red and displays thread breakage and head operation status.

# 3-2. Voltage check

Use a tester in principle for voltage check.

# (1) Color Change Card

Voltage	Application	Measuring points		Normal	Measuring
value	Application	Plus side	Minus side	range	range
+5V	* To control cards * To supply power to potentiometer	No. 1 pin of CN7	No. 2 pin of CN7	+4.85V to +5.2V	DC
+24V	* To drive Color Change Motor	No. 4 pin of CN7	No. 5 pin of CN7	+25.0V to +27.0V	DC
+24V (FXII, III, III-C)	* To drive Thread Trimming Picker Solenoid	No. 9 pin of CN7	No. 5 pin of CN7	+25.0V to +27.0V	DC
+50V (FXII-C only)	* To drive Thread Trimming Picker Solenoid	No. 9 pin of CN7	No. 5 pin of CN7	+52.0V to +58.0V	DC
+60V	*To drive Sequin Solenoid * For surge absorption circuit	No. 3 pin of CN7	No. 5 pin of CN7	+52.0V to +58.0V	DC

<Table 5> Color Change Card - power supply voltage

# (2) Head Card

Voltage Application		Measuring points		Normal	Measuring
value	Application	Plus side	Minus side	range	range
+5V	* To control cards	Pin No.8 of CN2	Pin No.5 of CN2	+4.85V to +5.2V	DC
+24V	* To drive Jump Motor and Thread Holding Motor	Pin No.4 of CN7	Pin No.5 of CN7	+25.0V to +27.0V	DC
+60V	* For surge absorption circuit	Pin No.3 of CN7	Pin No.5 of CN7	+52.0V to +58.0V	DC

<Table 6> Head Card - power supply voltage

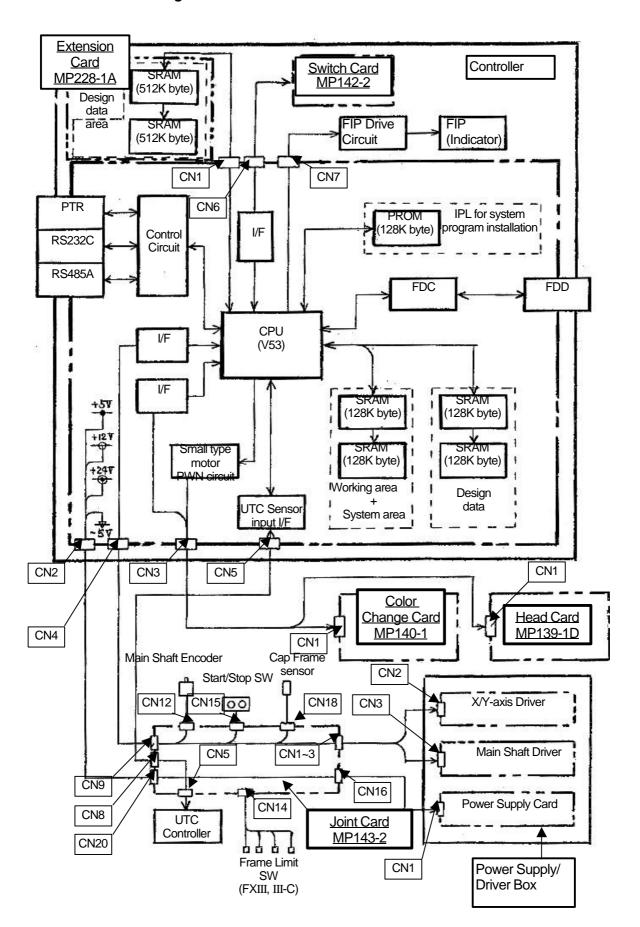

# (3) Tension Base Card

Voltage Application		Measu	ring points	Normal	Measuring
value	Application	Plus side	Minus side	range	range
+5V	* To control cards *To detect upper thread breakage	Pin No.8 of CN2	Pin No.5 of CN2	+4.85V to +5.2V	DC

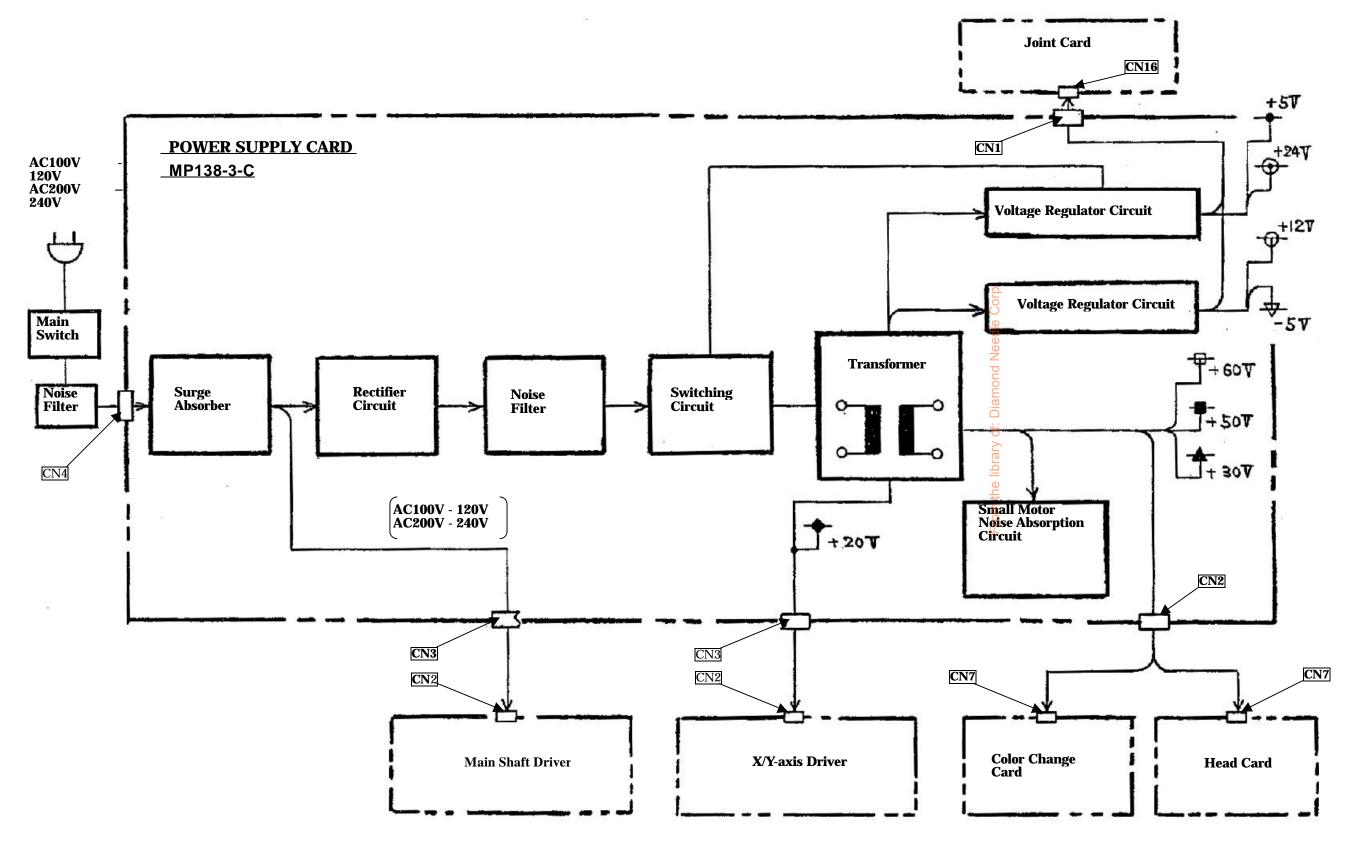

<Table7> Tension Base Card - power supply voltage

# 4. Block Diagrams/Connecting Diagrams

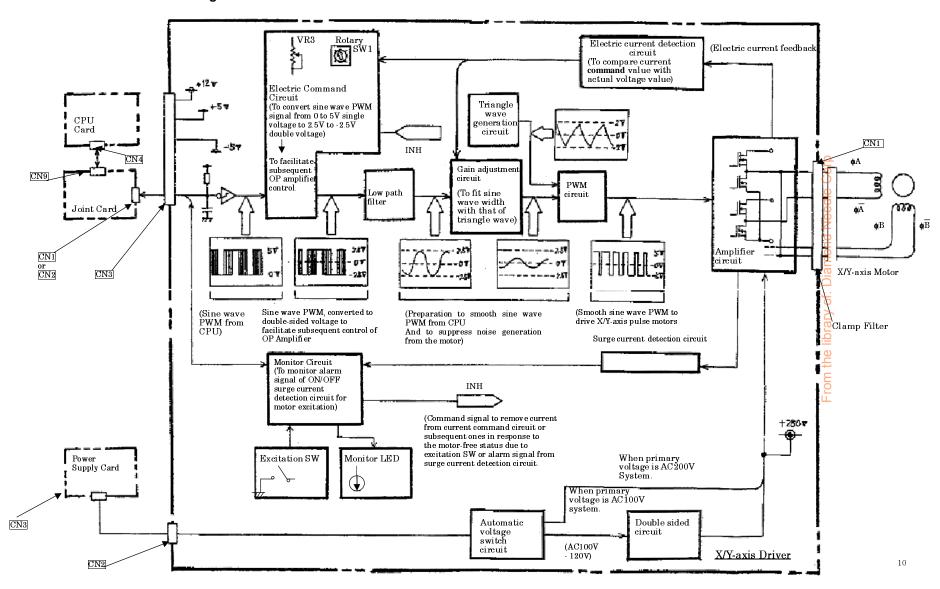

# 4-1. Controller - Block Diagram

# 4-2. POWER SUPPLY CARD - LOCK DIAGRAM

### 4-3. X/Y-axis Drivers - Block Diagram

# 4-4. Main Shaft Driver - Block Diagram
